

MPM-100 Multi Pigment Meter with GPS

Measures:
Chlorophyll Content
Anthocyanin Content
Flavonol Content
Nitrogen-Flavonol Index (NFI)

In Leaves and Grape Caps

Advantages

- ✓ Uses ratio fluorescence to measure **anthocyanin content** and **flavonol content**
- ✓ Uses leaf transmission in the far red and near infrared to measure **chlorophyll content**
- ✓ Uses the resulting chlorophyll and flavonol content measurements to determine a **nitrogen-flavonol index, NFI**
- ✓ Discrete single measurements
- ✓ Sample averaging (mean or median) of 2 to 8 samples
- ✓ 4GB internal memory
- ✓ USB output of labelled .csv data files, open in spreadsheet software
- ✓ Large, colour touchscreen display

Chlorophyll Content T850nm / T720nm

- Highly sensitive test for nitrogen and sulfur plant stress.
- Commonly used for nitrogen fertilizer management (e.g. N addition required when test plant chlorophyll falls to 90% of well-fertilized plant value).
- MPM-100 measures chlorophyll by leaf transmission of light at different wavelengths than most chlorophyll meters, for calculation of “Nitrogen Balance Index”.

Flavonol Content F660nm / F325nm

- A subclass of Flavonoids: flavonols provide photo-protection in the UV light spectrum and scavenge reactive oxygen species to protect plant photosynthesis.
- Flavonols are a good indicator of plant nitrogen status. Yellow pigment may also attract pollinators.

Anthocyanin Content F660nm / F525nm

- Anthocyanins in plants can be red, blue, purple or colourless depending on pH environment.
- Research suggests roles in extreme plant temperature protection, the attraction of pollinating animals and the promotion of animal seed distribution.

Nitrogen-Flavonol Index Chlorophyll (T850/T720) / Flavonol (F660/F325)

- Chlorophyll and flavonols are good indicators of N status in plants.
- Under N deficiency, plants produce more flavonoids or carbon-based compounds.
- Less sensitive to leaf age and thickness than standard chlorophyll measurements.

Assessment of Grape Ripeness

Flavonol and Anthocyanin contents are also very useful in determining grape maturity in the wine industry.

MPM-100 measures relative grape ripeness. Thin, grape skin “berry caps” are taken with a razorblade. As long as there is at least a small amount of chlorophyll present, results are repeatable and accurate with MPM-100.

Ratio Fluorescence Method

- ✓ Provides non-destructive measurement of several important plant chemicals at the same time.
- ✓ Successful measurements on even very small or opaque samples.

Anthocyanin and Flavonol Measurement:

By modulated, Ratio Fluorescence.
Samples can be opaque and smaller than the leaf clip area.

Chlorophyll Measurement:

Leaf light absorption at two wavelengths.
Samples must be > 9mm wide and not opaque.

*MPM-100/C and MPM-100/SPAD options

TECHNICAL SPECIFICATIONS

Measured Parameters:

Relative Chlorophyll Content, Flavonol, Anthocyanin and Nitrogen-Flavonol Index

Measurement Area: 9.5mm diameter circle

Distance from edge of measuring head to measurement area: 9mm

Repeatability: +/- 1%

Noise: <+/- 2%

Sources:

Flavonol content: LED at 325nm & LED at 660nm

Anthocyanin content: LED at 525nm & LED at 660nm

Chlorophyll content: Medical grade LED at 720nm & IR LED at 850nm.

***OPTIONS FOR CHLOROPHYLL CONTENT** to be specified at time of purchase:

MPM-100/C red LED at 635nm & IR LED at 931nm (same technique as CCM200-plus)

MPM-100/SPAD® red LED at 650nm & IR LED at 940nm. Produces “SPADa” units.

Fluorescence Detector: Single channel Si Photodiode with detection: 720nm to 900nm range

Transmittance Detectors:

Single channel Si Photodiode with diffuser to measure from 405nm to 950nm

Detection: Modulated light digitally controlled to minimize background detection

Temperature compensation included for light source and detector

Storage Capacity: 2GB of non-volatile flash memory

Modes: Single point measurement, averaging of 2 to 8 measurements, median and mean

User Interface: 240 x 320px color touchscreen

Output: USB 1.1

Temperature Range: 0-50°C

Power Source: 2 Rechargeable AA batteries & charger

‘Auto Off’ Interval: (no key press or download)

Programmable from 0 to 20 minutes

Size: 78mm x 180mm x 50mm

Weight: 275g / 0.6lb

Measuring time: 5s
